

10 years of WeKan ® FOSS kanban

- Maintainer: Lauri Ojansivu (xet7) ,Cross-Platform FOSS Developer, <https://github.com/xet7>
- WeKan source code: <https://github.com/wekan/wekan>

<https://wekan.fi>

What is WeKan 10 ?

- Before 0.20, numbering was whatever
- Every release version number adds 0.01
- 10.00 = 1000 releases of WeKan
- New release every 3rd day for 10 years
- Newest dependencies! Party year !

What happened in 10 years?

- 2017: Just for fun.
- 2018: Bounties and Commercial Support
- 2019-2025: 4 million lines of code changes
- 2026: Meteor 3. Translation to all languages.
Back to Sandstorm and Snap Stable.

WeKan now at Meteor 3, huge thanks harryadel !

Previous Conference Ukraine 2025-05-18	Now 2026-07-19
WeKan 7.90	WeKan 10.02
Meteor 2.14	Meteor 3.5
Node.js 14.21.4	Node.js 24.18.0
NPM 6.14.17	NPM 11.16.0
MongoDB 6.0.23	FerretDB v1 fork / SQLite
	(or MongoDB 7.x, 6.x. Or FerretDB 2/PostgreSQL)
Fibers 4.0.1	Async/Await
	Many old dependencies removed, code modernized

WeKan: Standard for Public Code

- Now: FerretDB v1 SQLite Server fork by default
- No MongoDB Server required
- Snap Stable upgrade from WeKan 6.09 to WeKan 10 happened at 15k Snap servers worldwide 2 days ago. It migrated automatically all MongoDB to FerretDB.
- FerretDB Server v1 fork by xet7 at: <https://github.com/wekan/FerretDB>

The screenshot displays the WeKan Kanban board interface. A card titled "#162 # Demo card" is selected, and an "Export card" dialog box is open. The dialog offers options to export the card to PDF or to Excel. The "Export card to PDF" option is selected, and a list of fields to include in the Excel export is shown. The fields include Labels, People (Creator, Owner, Members, Assignees), Board Info (Board, List, Swimlane), Dates (Created, Received, Start, Due, End), Description, Checklists, Subtasks, Comments, and Attachments. The "Download" button is highlighted. In the background, the Kanban board is visible with columns for "Integrations", "Attachments Import Export", "Login", "Permissions", "Next", "Minimize Optimize", and "Mostly Done". The card details show a date format of "YYYY-MM-DD", a due date of "2022-01-31 15:00 5", and a description of "Demo + Wishes :rainbow:". The card also has a voting question "Cool?" with 1 "for it" and 0 "against".

Accessibility fixes and enabling /accessibility page required by law

The screenshot shows the 'Wekaïi' Admin Panel with the 'Accessibility' section selected in the left sidebar. The main content area is titled 'Accessibility' and includes a link to the 'Accessibility' page, a confirmation message 'Accessibility page enabled' with a green checkmark, and two large text input fields for 'Accessibility title' and 'Accessibility content'. A 'Save' button is located at the bottom of the form.

Brute Force Protection Settings and Unlocking at Admin Panel

The screenshot displays the Wekai Admin Panel interface. The top navigation bar includes links for Admin Panel, Wekai logo, mobile/desktop views, a dropdown menu with 2 items, Settings, People, Attachments, Problems, and Notifications. The user profile 'Lauri Ojansivu' is shown on the right. The left sidebar contains a menu with options: Login, Email, Domains, Organizations, Teams, People, Locked Users (selected), Roles, and Shared templates. The main content area is titled 'Locked Users' and contains 'Brute Force Protection Settings'. It explains that these settings control login attempts against brute force attacks. The settings are divided into two sections: 'Settings for known users (correct username, wrong password)' and 'Settings for unknown users (non-existent username)'. Each section has three configurable fields: 'Failures before lockout' (set to 3), 'Lockout period (seconds)' (set to 60), and 'Failure window (seconds)' (set to 15). A 'Save' button is located at the bottom of the settings area.

What is NOT next?

- NO help to downgrade to old vulnerable WeKan. Because WeKan takes security seriously. All known security issues have been fixed.
- NO old WeKan 6.09 UI back, because new WeKan looks ugly. Show screenshots with arrows where it is ugly. I have now fixed all of those that were at first screenshots.

What is next?

- Back to more platforms. Add new platforms.
- More UI fixes. WeKan takes UI seriously.
- <https://github.com/wekan/wekan/issues>: Previously 700. Now 300. More to be fixed and closed ASAP !
- More Party of 10 years of WeKan !
- Summer: Walking, Sunshine, Ice Cream and Strawberries

Funding ? Sponsors?

- I moved to new rent apartment. I also moved 1 year ago, because rent price increased too much. There is still debt from previous year moving that is not paid yet.
- If some customer can pay for yearly support, please contact. Yearly support does not renew automatically. Most paid features have been already added. More will be added soon.
- Help welcome, how to apply for FOSS funding.
- Please contact <https://wekan.fi/commercial-support/>
